-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 2.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_.

### DETAILED ACTION

1. Claims 1-23 are pending in this Office Action.

#### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 6, 7, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Hilster et al (or hereinafter "Hilster").

As to claims 1 and 21, Hilster teaches the claimed limitations:

"creating a list having entries, individual entries of the list containing content of associated ones of the blocks" as creating a list entries such as 11/96-7/97 Relocation Assistance Coordinator, 3/95-10/96 English teacher (fig. 7, col. 2, lines 55-65);

"providing a database including a data structure associated with the document, the data structure specifying a manner of displaying at least one of the entries" as providing a database 14 including a web page forms associated with the resume. A web page form is specified to displaying entries of resume (col. 4, lines 55-67; col. 5, lines 1-20).

"inserting entries of the list into the data structure to form an output file".  
Inserting text strings within fields 94 according to the syntax of the source document/ file 12 and definition e.g., name, address, city, etc of each field 94.

Art Unit: 2172

The stored resume from resume storage is also added to the third web page form. Finally, the third web page form is sent back to the user site where it is displayed by the web browser on monitor (col. 5, lines 30-45).

Hilster does not explicitly teach the claimed limitation "dividing a document having a first structure into blocks" as a resume is divided into parts such as Experience, Education, Certificates and Interests (fig. 7, col. 2, lines 55-65);

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Hilster's teaching of a resume is divided into parts such as Experience, Education, Certificates and Interests in order to convert loosely structured document to another structure document that can be read by a user.

As to claim 2, Hilster teaches the claimed limitation "further comprising transmitting at least a portion of the output file over a network to a client device" as (col. 5, lines 30-65).

As to claim 6, Hilster teaches the claimed limitation "wherein the output file contains sub-documents and a table of contents page listing the labels, wherein individual sub-documents are associated with individual labels" as (fig. 6C).

As to claim 7, Hilster teaches the claimed limitation "extracting a structure of the document to form an extracted data structure associated with the document; modifying the extracted data structure; storing the modified extracted

Art Unit: 2172

data structure as the data structure" as (col. 3, lines 40-67).

4. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Hilster et al (or hereinafter "Hilster") in view of Cheng et al (or hereinafter "Cheng") (USP 6421656).

As to claim 3, Hilster discloses the claimed limitation subject matter in claim 1, except the claimed limitation "assigning a classification to individual list entries". Cheng teaches assigning a classification to entries as nodes (fig. 11).

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Cheng's teaching of assigning a classification to entries as nodes to Hilster's system in order to store content of a document in order for a user to view and to retrieve content or a portion of a document quickly.

As to claim 4, Hilster discloses the claimed limitation subject matter in claim 1, except the claimed limitation "merging list entries having the same classification". Cheng teaches merging nodes of the same path (col. 15, lines 60-65).

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Cheng's teaching of merging nodes of the same path to Hilster's system in order to save memory save for storing document.

Art Unit: 2172

5. Claims 5, 8, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Hilster et al (or hereinafter "Hilster") in view of Jeyaraman (USP 6377957).

As to claim 5, Hilster discloses the claimed limitation subject matter in claim 1, except the claimed limitation "wherein the creating a list further comprises re-ordering the list according to the content of individual list entries".

Jeyaraman teaches re-ordering nodes within a tree (fig. 6E).

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Jeyaraman's teaching of re-ordering nodes within a tree to Hilster's system in order to transform a old data structure into a new data structure.

As to claim 8, Hilster discloses the claimed limitation subject matter in claim 1, except the claimed limitation "wherein the modifying the extracted data structure further comprises adding labels to the extracted data structure".

Jeyaraman teaches each node or end leaf of tree can be added, deleted, or modified (fig. 6)

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Jeyaraman's teaching of each node or end leaf of tree can be added, deleted, or modified to Hilster's system in order to transform a old data structure into a new data structure.

Art Unit: 2172

As to claim 9, Hilster teaches the claimed limitation "wherein the modifying the extracted data structure further comprises removing a portion of the extracted data structure" as (col. Lines 50-67).

As to claim 10, Hilster teaches the claimed limitation "wherein the modifying the extracted data structure further comprises removing a portion of the extracted data structure from a first location within the extracted data structure and adding the portion of the extracted data structure at a second location within the extracted data structure" as (col. 5, lines 50-67).

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over de Hilster et al (or hereinafter "Hilster") in view of Sedlar (USP 6549916).

As to claim 11, Hilster discloses the claimed limitation subject matter in claim 7, except the claimed limitation "wherein the document comprises an HTML document, an XML document, or a PDF document". Sedlar teaches HTML document and XML document (col. 18, lines 60-67).

It would has been obvious to a person of an ordinary skill in the art at the time the invention was made to Sedlar's HTML document and XML document to Hilster's system in order to allow a user to view different format of a document

7. Claims 12, 22, 13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Hilster et al (or hereinafter "Hilster") in view of Fields et al (or hereinafter "Fields") (USP 6128655).

Art Unit: 2172

As to claims 12 and 22, Hilster teaches the claimed limitations:

“extracting a structure of a first document to form a first data structure” as (col. 3, lines 5-40);

“modifying the first data structure to form a second data structure” as (col. 4, lines 55-67);

“the content of the second document being different from content of the first document” as (col. 2, lines 60-67).

Hilster does not explicitly teach the claimed limitation “extracting content of a second document; inserting the content of the second document into the second data structure”.

Fields teaches that retrieving a HTML page and inserting the content of HTML page within a template or a data structure (col. 4, lines 50-65).

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Hilster’s teaching of retrieving a HTML page and inserting the content of HTML page within a template or a data structure to Hilster’s system in order to reduce the expense and effort of providing content in a new hosting web site and to allow a publisher of an electronic document to control the reformatting of the document by a host site, to automatically update material on the hosting web site as it is changes on the content provider web sites.

Art Unit: 2172

As to claim 13, Hilster teaches the claimed limitation "wherein the modifying the first data structure further comprises deleting a portion of the first data structure" as (fig. 6, col. 4, lines 55-65).

As to claim 15, Hilster teaches the claimed limitation "wherein the first and second documents are web pages" as (col. 4, lines 55-67).

8. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over de Hilster et al (or hereinafter "Hilster") in view of Fields et al (or hereinafter "Fields") (USP 6128655) and further in view of Jeyaraman.

As to claim 14, Hilster discloses the claimed limitation subject matter in claim 12, except teaches the claimed limitation "wherein the modifying the first data structure further comprises adding a label to a portion of the first data structure". Jeyaraman teaches each node or end leaf of tree can be added, deleted, or modified (fig. 6)

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Jeyaraman's teaching of each node or end leaf of tree can be added, deleted, or modified to Hilster's system in order to transform a old data structure into a new data structure.

Art Unit: 2172

9. Claims 16 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cheng et al (or hereinafter "Cheng") (UPS 6421656).

As to claims 16 and 23, Cheng teaches the claimed limitations:

"extracting a first data structure from a first document, content of the first document being stored in nodes of the data structure" as retrieving XML documents that are stored in a tree. This tree has nodes for storing the content of the documents (fig. 8, col. 15, lines 50-65);

"assigning a label to the nodes of the first data structure that store the content of the document based on the content stored in the nodes" as (fig.8, col. 15, lines 50-65).

Cheng does not explicitly teach the claimed limitation "generating a one-dimensional list of the nodes that include the content of the document".

However, Cheng teaches storing XML documents in created columns of a relational database. A column is represented as a one-dimensional (col. 3, lines 55-60).

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Cheng's teaching of storing XML documents in created columns of a relational database in order to minimize the computer time used and the cost performing a query and to provide a fast search documents stored in column data.

10. Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cheng et al (or hereinafter "Cheng") (UPS 6421656) in view of Fields.

As to claim 17, Cheng discloses the claimed limitation subject matter in claim 16, except the claimed limitation "providing a database including a second data structure associated with the first document, the second data structure specifying a manner of displaying at least one of the entries; inserting entries of the list into the data structure to form an output file". Fields teaches that providing a database 109 that contains templates associated with HTML page. The system displays the template after inserting HTML page to a user (col. 4, lines 50-65).

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Fields's teaching of providing a database 109 that contains templates associated with HTML page. The system displays the template after inserting HTML page to a user to Cheng's system in order to provide an accuracy of documents in proper format to a user for viewing or reading.

As to claim 18, Cheng discloses the claimed limitation subject matter in claim 16, except the claimed limitation "extracting a structure of a second document to form a second data structure, the second document having a same structure as the first document; modifying the second data structure to form a third data structure; storing the third data structure in a database".

Fields teaches providing a database 109 that contains templates associated with HTML page. The system displays the template or web page

Art Unit: 2172

after inserting HTML page to a user. This web page which is represented as a third data structure is stored in a database (col. 4, lines 50-65).

It would have been obvious to a person of an ordinary skill in the art at the time the invention was made to apply Fields's teaching of providing a database 109 that contains templates associated with HTML page. The system displays the template after inserting HTML page to a user to Cheng's system in order to provide a accuracy of documents in proper format to a user for viewing or reading.

As to claim 19, Cheng teaches the claimed limitation "removing at least one portion of the second data structure" as (col. 3, lines 60-65).

As to claim 20, Cheng discloses the claimed limitation "wherein the modifying further comprises moving at least one portion of the second data structure from a first location within the second data structure to a second location within the data structure" as (col. 3, lines 60-65).

### ***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Meltzer et al (USP 6125391).

Art Unit: 2172

***Contact Information***

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cam-Y Truong whose telephone number is (703-605-1169). The examiner can normally be reached on Mon-Fri from 8:00AM to 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Breene, can be reached on (703-305-9790). The fax phone numbers for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703-305-3900).
